## AI & THE INDIAN LEGAL SYSTEM

NAAC ACCREDITED

### ABOUT FAIRFIELD COLLEGE

The Fairfield Institute of Management and Technology (FIMT) is a NAAC accredited prestigious college in Delhi with an ambiance representing the academic culture of the capital town of the largest democracy in the world and a vibrant emerging economy. Established by the Fairfield Group of Institutions, it is an 'A' grade college approved by the Government of NCT of Delhi, affiliated with the prestigious Guru Gobind Singh Indraprastha University. FIMT is approved by All India Council of Technical Education (AICTE), Bar Council of India (BCI), National Council for Teacher Education (NCTE) and other authenticating bodies. Fairfield Group of Institutions is backed by a legacy of 50 years of shaping students' careers in the country in areas of Management, Commerce, Teachers' education, Journalism, Information and Communication Technology, Humanities, and Law & Legal Studies. The institutional distinction includes social outreach, field studies, and job orientation programs in respective areas of Study with specialized Add On Courses.

### INTRODUCTION

To keep up with the changing contemporary scenario of the legal profession, legal education calls for addition of value i.e. students must acquire something more than what is provided in the curriculum of the university. FIMT-School of Law offers a wide variety of short-term certificate courses, which are conducted beyond classroom. These courses are conducted by professionals and industry experts and help students stand apart from the rest in the job market by adding further value to their resume.

The course will engage with key themes in the interaction of artificial intelligence with different laws including but not limited to Consumer Protection Laws, Intellectual Property Laws, Forensics, Health Care Laws, Human Rights, Cyber Security Laws, International Law and Criminal Justice System. The course shall also briefly touch upon implications of AI on our society, lawyers, judiciary, domestic and global approaches to AI governance, ethics in AI, the application of data protection principles, and AI discrimination and bias etc.

Students will be exposed to proposed legislation and policy frameworks on artificial intelligence in India and globally, international policy developments, current uses of AI technology and emerging challenges.

This course will equip students with the necessary understanding and knowledge required to effectively navigate the rapidly evolving space of AI and law, and assess the contemporary developments.

Given the recency of this area of law, reliance will be placed on secondary reading materials and articles. The course will take place in the form of lectures and open discussions on the materials presented.

### COURSE OBJECTIVES

- The students of the course will be introduced to AI technology and will become cognisant of its opportunities and challenges, and its potential impacts on society, individuals and the law.
- The students will be equipped to navigate the interaction between AI and ethics, and consider the ethical principles within which the use of AI technologies are being situated. They will be provided with a breakdown of the ethical principles which have emerged surrounding the use of AI.
- Students will become familiar with the regional and international policy processes which surround AI technology and the role of intergovernmental organisations in AI governance.
- Students will be equipped with knowledge of data protection principles and their interaction with AI systems.
- Students will delve into problems surrounding AI discrimination and explore how bias creeps into AI systems at various stages, and the implications that this may have upon individuals and our society.

The students will explore the emerging application and use cases of AI technologies. Students will familiarise themselves with the new uses of AI technologies such as facial recognition, emotional recognition, predictive policing, AI use in workplaces, AI use in healthcare, etc. and consider how this may impact individuals and society

### COURSE OUTCOMES

- Facilitate knowledge exchange and experience sharing on artificial intelligence, existing norms and standards in the field, and its implications with respect to various laws;
- The course will provide an overview of the interactions between AI and Law and delve into the current domestic and international frameworks which seek to govern AI technology.

### EVALUATION METHODOLOGY OF THE CERTIFICATE COURSE

Evaluation methodology includes Hybrid Mode, Subjective and Objective Assessment, Presentation, class contribution and any other component as decided by the respective course faculties. A minimum of 75% attendance is a prerequisite for the successful completion of this program.

The program may require participants to work on individual/group assignments and/or projects. The main objective of such assignments / projects will be to help the participants apply their conceptual learning in the program to actual organizational decision scenarios.

The participants will have to secure the minimum passing marks in the respective evaluation.

Participants who successfully complete the same and satisfy the requisite attendance criteria, will be awarded a certificate of completion.

Participants who are unable to clear the evaluation criteria but have the requisite attendance will be awarded a participation certificate.
