

BCA - VI SEM

LINUX ENVIRONMENT (CODE: 306)

S. NO.	NAME OF STUDENT	ENROLL. NO.	TOPICS
1	Akhil	00290102016	UNIX & LINUX:- Overview of UNIX and LINUX Architectures
2	Annold Massey	00390102016	UNIX Principles,GNU
3	Arpita Tanwar	00490102016	Getting help in Linux with -help,whatis,man command, info command
4	Awlesh Kazi	00590102016	simple commands like date,whoami, who, w, cal, bc
5	Aysuhi Bhanot	00690102016	hostname,uname
6	Gaurav	00790102016	concept of aliases
7	Gaurav Gupta	00890102016	Linux filesystem types ext2, ext3, ext4
8	Gaurav Kumar	00990102016	Basic linux directory structure
9	Gurkirat Singh	01090102016	the functions of
10	Himani Arora	01190102016	basic directory navigation commands like cd, mv, copy,rm,
11	Himanshu Rawat	01290102016	cat command ,
12	Jyoti Sharma	01390102016	importance of /etc/inittab
13	Keshav	01490102016	Standard Input and Output
14	Manav Keswani	01690102016	Redirecting input and Output
15	Nijo Jose	01890102016	Using Pipes to connect processes
16	Nisha Suneja	01990102016	tee
17	Nitin Singh Rawat	02090102016	Linux File Security
18	Puneet Bisht	02290102016	permission types
19	Rahul Juyal	02390102016	examining permissions
20	Sahil Gupta	02590102016	changing
21	Shivam Srivasatva	02690102016	default permissions and umask
22	Shobhit Jain	02790102016	Vi editor basics, three modes of vi editor
23	Shreya Bhardwaj	02890102016	concept of inodes,inodes and directories
24	Shruti Vallabh Sharma	02990102016	cp and inodes
25	Shubhankar Gupta	03090102016	symbolic links and hard links

26	Stanley Stephen	03190102016	mount and umount command
27	Udit Sharma	03290102016	creating archives,
28	Alisha Chadha	35290102016	ar, gzip, gunzip, bzip2, bunzip2
29	Manav Garg	35390102016	ar, gzip, gunzip, bzip2, bunzip2- basic usage of these commands
30	Mohit Kumar Tiwari	35490102016	Environment variables
31	Nishant Panwar	35590102016	HOME, LANG, SHELL, USER, DISPLAY, VISUAL
32	Varun Sharma	35690102016	Local variables
33	Prakash Bohra	40190102016	concept of /etc/passwd, /etc/shadow
34	Anshul Soni	40290102016	/etc/group, and su- command
35	Ranjeet Singh	40390102016	special permissions
36	Prince Sethi	40490102016	suid for
37	Jagmeet Singh Babbar	40590102016	sgid for an executable,
38	Nikhil Sharma	40690102016	sgid for a directory
39	Karandeep Singh	40890102016	sticky bit for a directory
40	Gaurav Bhalla	40990102016	tail, wc, sort, uniq, cut, tr, diff, aspell
41	Sandeep Kumar Rakesh	41090102016	basic shell scripts grep, sed, aw
42	Gaurav Pal	50190102016	Process related commands
43	Lakshay Sadana	50290102016	ps, top, pstree, nice, renice
44	Mohit Dagar	50390102016	Introduction to the linux Kernel
45	Roopesh Batra	50490102016	getting started with the kernel
46	Sherin J. Mathew	50690102016	obtaining the kernel source
47	Sumit Sati	50790102016	installing the kernel source
48	Yatesh	50890102016	using patches,
49	Abhishek Baliyan	00151402016	the kernel source tree
50	Anuj Kumar	00251402016	building the kernel process management
51	Deepanshu Parashar	00351402016	process descriptor and the task
52	Keshav Kumar Jha	00451402016	allocating the process descriptor
53	Mahesh Kumar	00551402016	storing the process descriptor

54	Nikhil Sehgal	00651402016	process state
55	Rahul Bishwas	00751402016	manipulating the current process state,
56	Rahul Yadav	00851402016	process context
57	Ritik Tyagi	00951402016	the process family tree,
58	Shrishti	01051402016	the Linux
59	Shubham Aswal	01151402016	overview of system calls
60	Bhavya Dora	35151402016	Intoduction to kernel debuggers
61	Karan Kumar	35351402016	kernel debuggers for windows
62	Pradeep Kumar	35451402016	kernel debuggers for linux
63	Vishal Sharma	35551402016	Diffrence between Windows and Linux
