Date: 20th Dec 2022

Notice

We are pleased to inform that our Institute in association with NIOS (National Institute of Open Schooling) is organizing a **Two-day National Conference entitled "Online Education: Ground Realities and Challenges" on January 6th and 7th, 2023**, at the FIMT campus, New Delhi.

In this offline mode conference, an effort will be made to provide a global forum for practitioners, policymakers, educators, researchers, and students to share their practical experiences, knowledge, and insight into the evolution, formulation, and implementation of online education systems to meet the challenging requirements of the globalised economy. The main goal is to critically evaluate previous educational developments and incremental improvements to date in order to gain a better understanding of the scenario leading to an online education system.

Full Paper Submission: 24th December 2022

Intimation of Acceptance: 31st December 2022

Conference Dates: 6th & 7th January 2023

FAIRFIELD
Institute of Management & Technology
(Affiliated to GGSIP University, New Delhi)

ABOUT THE INSTITUTE :

The Fairfield Institute of Management and Technology (FIMT) is a NAAC accredited prestigious college in Delhi with an ambiance of representing the academic culture of the capital town of the largest democracy of the world and a vibrant emerging economy. Established by the Fairfield Group of Institutions, it is an 'A' Grade College approved by the Government of NCT of Delhi, affiliated to the prestigious Guru Gobind Singh Indraprastha University, which is the first university established by the Government of Delhi. FIMT is approved by the Bar Council of India and National Council for Teacher Education and other authenticating bodies. It is backed by a legacy of 47 years of shaping student's career in the country in areas of Management, Commerce, Teachers' Education, Journalism, Information and Communication Technology, Humanities, and Law and Legal Studies. The institutional distinction includes social outreach, field studies in Academic Research and job orientation programs in respective areas of study.

ABOUT THE NATIONAL INSTITUTE OF OPEN SCHOOLING (NIOS) :

The National Institute of Open Schooling (NIOS) formerly known as National Open School (NOS) was established in November 1989 as an autonomous organization in pursuance of the National Policy on Education 1986 by the Ministry of Education (MOE), Government of India. NIOS is providing a number of Vocational, Life Enrichment, and community-oriented courses besides General and Academic Courses at the Secondary and Senior Secondary levels. It also offers Elementary level Courses through its Open Basic Education Programs (OBE). NIOS is an "Open School" to cater to the needs of a heterogeneous group of learners up to the pre-degree level.

ABOUT THE CONFERENCE :

The educational process is constantly in transition and evolving, particularly in light of the significant changes brought about by the development of ICT-based tools and technology. The development of new modes and methods, as well as the use of online platforms, have greatly improved pedagogy for learning and teaching. For 21st-century educational institutions, the shift to online education has been a logical progression. Many educators view it as a cutting-edge innovation that has great potential to improve instruction and learning, support lifelong learning, and engage non-traditional students of all degree types. In order to discuss these developments, FIMT proposes to organise a conference on "Online Education - Ground Realities and Challenges"

In this proposed offline mode conference, an effort will be made to provide a global forum for practitioners, policymakers, educators, researchers, and students to share their practical experiences, knowledge, and insight into the evolution, formulation and implementation of Online education systems to meet the challenging requirements of the globalised economy. This conference will bring academics and industry together to discuss the future of business education as well as current trends and changes. The main objective is to create a knowledge-sharing platform for the dissemination of research and empirical findings in Online education through experimental studies, descriptive models, case studies, innovative concepts, and state-of-the-art studies.

We invite scholars, academicians and practitioners to contribute research papers related to the conference's theme to help us better understand and participate with these contentious issues. The following are the general areas/sub-themes that will be of interest for the conference. Papers may be submitted on any of the sub-themes or related topics listed below.
